GOAL

My goal is to become a senior full stack developer. So, I will try best myself to improve my work skills everyday.

I hope that I will have a chance to join your team to help me reach my goal!

SKILLS

React Js

- React Class/Function Components
- Higher-Order Components, React Hooks
- React Router & API
- Libraries: Redux Saga/Thunk, Axios, Styled Components, React Spring, Ant Design, Formik, Yup, Tiny MCE, etc.,

HTML/CSS/Javascript

- HTML/HTML5, CSS3/SASS/SCSS
- Animation, responsive
- ES5/ES6/DOM, Prototype/Class
- Ajax, Async/await
- Libraries: Bootstrap, w3school, basic JQuery, Swiper, Owl Carousel, etc.,

Other Skills

- English communication
- MS Office, Photoshop
- Basic OOP, Java, Github

Further skills

- I'm an honest, highly disciplined person and friendly
- Hardworking, willing to learn and work with new things

PORTFOLIO

JIRA CLONE – REACT JS

React Js Project

Live demo and Github links:

- 🌐 <https://deploying.netlify.app>
- 🔗 <https://github.com/xbphamvn/deploying...>

Technology:

- Use react higher-order components:
 - Route and the render attribute of Route to create Global template, Login Template
 - Formik to get value from input, textarea field of tiny MCE
- Use Axios and redux saga to communicate with Backend to handle client actions like: get all projects, login, create new project, update project detail, assign/remove members of a project...
- Use localStorage (setItem, getItem) to store and get logged user data (accessToken, other data), that to check user's authorization when communicate with Backend
- Use redux saga to handle state, onClick, onChange, onSubmit...
- Use Ant Design to support building layout, popup, drawer faster
- Use withFormik, Yup to get input value, to validation check
- Use redux saga to handle state, onClick, onChange, onSubmit
- React function component, React Hooks
- Libraries: axios, redux saga, ant design, Formik, Yup, tiny MCE, react router DOM, Bootstrap 5.0

RESUME ONLINE – REACT JS

React Js Project

Live demo and Github links:

- 🌐 <https://xbphamvn.netlify.app>
- 🔗 https://github.com/xbphamvn/reactjs_resume.git

Technology:

- Use react higher-order components (Route and the render attribute of Route) to create Global template. Base on that can easy to create a lot of different templates when render a page component
- Use JSON files (array and object) to optimize code lines when render component
- Use redux-saga to handle state, onClick, onChange. And to optimize code lines when render popup to show the detail of a project
- Use react-spring to make animations for components
- React function component, React Hooks
- Libraries: react redux saga, react-spring, react router DOM, Bootstrap
- Multi responsive for desktop, tablet, mobile

UDEMY CLONE – HTML/SASS/JS

React Js Project

Live demo and Github links:

- 🌐 <https://udemycloneproject.netlify.app>
- 🔗 https://github.com/xbphamvn/html_udemy.git

Technology:

- CSS pre-processing SASS platform:
 - Use mixin, variable to help create main CSS faster
 - Make dark theme faster
- Use javascript to truncate the title and toggle the dark mode option button
- HTML5/CSS, CSS classes name according to BEM rules
- Libraries: Owl carousel, Bootstrap.
- Multi responsive for desktop, tablet, mobile

OVER 40 MINI/FOUNDATION FRONTEND PROJECTS

ReactJs/Javascript/HTML/CSS/Jquery

Github links and live demo:

- Visit my Github repositories to see projects that I have done:

 <https://github.com/xbphamvn>

- Visit my resume page for live demo my portfolio:

 <https://xbphamvn.netlify.app>

Summary:

- React JS: Over 10 mini/foundation and foundation projects. Technologies: React Class/Function Component, React Hooks, React redux saga/thunk, Axios, React Spring, Ant Design, Formik, Yup, Tiny MCE, etc.,
- HTML/CSS/Javascript/Jquery: Over mini/foundation 20 and foundation projects. Technologies: HTML/HTML5, CSS3/SASS/SCSS, ES5/ES6/DOM, Js Prototype/Class, Ajax, RESTful API, Jquery, Bootstrap, etc.,

EXPERIENCES

LILAMA CORP., - MONG DUONG 1 TPP PROJECT / 2012 - 2015

Materials Controller

Main responsibilities:

- Using communication English to work exchange with engineers of EPC contractor (Hyundai E&C).
- Supervise and control in the taking equipments/materials process of LILAMA's subsidiaries at LILAMA warehouse and EPC contractor warehouse.

EVE FINE International Co.,Ltd. / MAY 2019 – CURRENT

Business Assitiant

Main responsibilities:

- Support and guide customers to choose Mitsubishi Electric products that fit with technical requirement.
- Then, send customers the quotation. Make the procedures to take goods from warehouse and handover them to customers.

CERTIFICATIONS

International Certificate of English for Life 2017

Issue by **Singapore** International Academy

B2 Class of driver's license 2016

EDUCATION

CyberLearn.Vn Academy / May 2020 – Current

Programming course: how to thinking in programming, problem-solving, Java, OOP

Frontend Foundation Course: ReactJs, HTML, CSS, JS(ES5/ES6), SASS/SCSS, Ajax, Git...

National University of Civil Engineering / 2007 - 2012

Student Training Course
